SAP HANA Cloud Platform Essentials
Week 1, Unit 4

```java
import java.net.HttpURLConnection;
import java.net.URL;

String user = "you@example.com"; //your email address that
you use for SAP HANA Cloud Platform

HttpURLConnection connection = (HttpURLConnection)
new
URL("https://hcpopensapgamservbackae79b5f7e.hana.ond
emand.com/HCPopenSAPGamificationServiceBackend/End
point/?user=" + user + "&unit=Z4d1P9").openConnection();
connection.setRequestMethod("POST");
connection.setRequestProperty("Accept-Charset", "UTF-8");
connection.connect();
System.out.println(connection.getResponseCode());
connection.disconnect();
```
